

THE BOEING COMPANY - EVERETT PLANT (Boeing Everett Plant)

The Washington State Department of Ecology (Ecology) invites you to comment on revisions to an agreed order to include two interim actions for The Boeing Company, Everett Plant (Boeing Everett Plant) located at 3003 West Casino Road, Everett, Washington.

Ecology and The Boeing Company (Boeing) propose to remove PCB contaminated freshwater sediments from Powder Mill Creek to prevent further downstream migration to less contaminated areas of the creek. In addition, source areas of trichloroethylene (TCE) contaminated groundwater within Powder Mill Gulch will be remediated by in-situ heating and vapor extraction. The in-situ heating and vapor extraction will involve subsurface heating and collection of TCE vapors to maximize removal of subsurface TCE.

Ecology has determined that these interim actions will not have significant adverse impacts on the environment. Therefore, Ecology is recommending a State Environmental Policy Act (SEPA) determination of non-significance (DNS) for this activity.
